Singapore Institute of Technology

Dear Sirs:

As a Mathematics with Computer Science visiting professor at Guangdong-Technion, Israel Institute of Technology (GTIIT), I am addressing to you in order to recommend Yu Chen for studies at your prestigious university. I have known Mr. Yu in his junior year of college. Mr. Yu attended the courses Data Structures lectured by me at GTIIT.

Regarding Yu's academic capabilities I am plenty convinced that he has a solid basis in programming languages as C and Python. He managed to provide good solutions for several challenging exercises in my courses and to program concrete examples whenever it was required. For sure he gratefully impressed me with his abilities in literature survey, scientific programming, and creative thinking.

As student in GTIIT he was pointed as Laboratory Student Assistant, for the current academic year.

On a personal level, I consider Yu Chen as an intelligent, motivated, and industrious person. I should mention that he has personal initiatives in web services development among Chinese communities, in arts, mainly musical singing, and sports, e.g. he has run the Shantou city marathon. I express to his application the most vital support without reservations. In case of any further questions about him, please get in touch with me freely.

Sincerely yours,

Dr. Guillermo Morales Luna
Visiting Professor
